Contents

- Paper 1 **Keynote Paper:**
“Yes, I’ll take one HPHT seal system and a side of documentation”
Buc Slay, Halliburton Energy Services, USA +++ paper unavailable at time of print+++

Session 1: Developments in High Performance Materials

- Paper 2 **Elastomer sealing in extreme conditions**
John Kerwin, Precision Polymer Engineering Ltd, UK
- Paper 3 **From low to high: low temperature-stable polyurethane prepolymer for production of high temperature-stable polyurethane hybrid elastomer**
Dr Wayne Stevens, Dr Alexander Celik & Nadeem Riyazuddin, Rosehill Polymers Ltd, UK
- Paper 4 **Kalrez[®] perfluoroelastomer parts for demanding oil & gas applications: FFKM 0090 for explosive decompression, Norsok M710 approved FFKM 0040 for low temperature, with static sealing down to -42°C**
Jean-Luc Matoux, DuPont Performance Polymers, Switzerland & Paul A Trillizio Jr, DuPont Performance Polymers, USA +++ paper unavailable at time of print+++
- Paper 5 **A review of elastomers for steam service**
Daniel L Hertz III, Seals Eastern, Inc, USA

Session 2: Sealing Solutions

- Paper 6 **Engineering an elastomer product by optimising RGD resistance and low temperature sealing performance**
Peter Warren, Andrew Douglas & Stephen Winterbottom, James Walker & Co Ltd, UK
- Paper 7 **New low temperature perfluoroelastomer for sealing in extreme operating environments**
Stefano Arrigoni, Fabiano Merli & Peter Farrow, Solvay Solexis SpA, Italy
- Paper 8 **New HNBR polymers for demanding sealing applications**
Paul Ruscoe, Zeon Chemicals Europe Ltd, UK +++ paper unavailable at time of print+++

Session 3: Novel Compounds and Compounding

- Paper 9 **The compounders approach to developing compounds for components to meet major specifications in the oil and gas industry**
Michael Winrow, Clwyd Compounds, UK
- Paper 10 **How to meet electrical conductivity targets**
*Ing Christine Van Bellingen, Eusebiu Grivei, Thomas Grünberger & Nicolas Probst
TIMCAL, Belgium*
- Paper 11 **Halogen free and flame retardant compounds with submicron sized fillers**
Dr Annika Luks, Nabaltec AG, Germany

Session 4: Testing

- Paper 12 **Materials selection and life-time assessment for polymeric materials in harsh chemical environments**
Dr Karin Jacobson, Swerea KIMAB AB, Sweden
- Paper 13 **Durability of polymers under injection conditions for enhanced oil recovery and carbon capture**
Rod Martin, Morris Roseman, Sabine Munch, Keyur Somani & Barry Thomson, MERL, UK
- Paper 14 **FE-implementation of a constitutive model to simulate the behaviour of seals in explosive decompression**
Dr Benoît Omnès & Dr Emmanuel Sauger, CETIM Centre Technique des Industries Mécaniques, & Pr Jean-Claude Grandier, Dr Mickael Gueguen & Eric Laine, LMPM (UMR-CNRS), France

Session 5: Advances in Polymer Technology: New Applications

- Paper 15 **Positive displacement motor reliability improvement by elastomer/ drilling fluid compatibility testing**
Dr Pu Wang, Schlumberger Stonehouse Technology Centre, UK
- Paper 16 **High performance elastomers in cables for offshore and arctic regions**
Dr Andreas Roos & Manuel La Rosa, Lanxess Deutschland GmbH, Germany
- Paper 17 **Flexible insulation solutions for the oil and gas industry**
Dr Juergen Weidinger, Armacell International Holding GmbH, Germany & Dr Mark Swift, Armacell Ltd, UK
- Paper 18 **High performance thermoplastics in HPHT service: material design for targeted applications**
Dr Tim Bremner, Hoerbiger Corporation of America, Inc, USA
- Paper 19 **Evaluation techniques for the assessment of polymer performance in multilayer pipe systems for oil and gas**
Dr Ed Clutton, L J Rose & K V Ross, Impact Solutions, UK
