1 Rubber in the Context of Growing Trees.....	3
1.1 Wood and Wood Processing	3
1.2 Chemical Properties of Wood Dust	4
1.3 Occupational Exposure to Wood Dust and the Effects on Health	6
1.3.1 Health Effects of Wood Dust.....	7
1.3.2 Wood Dust and Cancer	8
1.3.3 Effects of Wood Preservatives	8
1.4 Rubberwood Dust	9
2 Rubber Industries	17
2.1 Background	17
2.2 Growing of Rubber Trees and Rubber	18
2.2.1 Processing of Rubberwood	18
2.2.2 Natural Rubber Latex	19
2.3 Manufacturing Processes of Rubber Products.....	23
2.3.1 General Manufacturing of Rubber Products	23
2.3.2 Dipped Latex Technology	25
2.4 New Technologies for Rubber-Making	27
3 Legislation Related to Health and Safety	31
3.1 The Law Affecting Health and Safety in the UK	31

Update on Health and Safety in the Rubber Industries

3.1.1	UK Health and Safety at Work Act (HASWA) 1974	31
3.1.2	Statutory Duties of the Employer	31
3.1.3	Statutory Duties of Employees.....	32
3.1.4	The Institutions	32
3.1.5	UK Control of Substances Hazardous To Health Regulations (COSHH)	33
3.1.6	The Code of Practice of the British Rubber Manufacturers' Association (BRMA)	33
3.2	The Law Affecting Health and Safety in the USA.....	34
3.2.1	Federal Regulation of Occupational Health and Safety in the Workplace.....	35
3.2.2	Workers' Compensation	37
3.3	Occupational Health and Safety (OHS) Legislations in the Asia/Pacific Rim	37
3.3.1	Japan.....	37
3.3.2	India.....	38
3.3.3	China	39
3.3.4	Australia.....	39
4	Safety in the Rubber Industry	41
4.1	Industrial Statistics	41
4.2	Mill and Calender Safety	45
4.2.1	Mill Safety.....	45
4.2.2	Calender Safety	48
4.2.3	Machine Lockout	50
4.3	Fire and Explosions	52
5	Health Effects Related to Working in Rubber Industries....	55
5.1	Epidemiology.....	55
5.2	Allergy to Natural Rubber Latex (NRL)	59

5.3	Skin Irritation and Dermatitis	62
5.4	Rubberwood Dust	64
5.5	Carbon Black.....	65
5.6	Crystalline Silica and Silicosis	67
	5.6.1 Autoimmune Diseases	68
	5.6.2 Tuberculosis	68
	5.6.3 Kidney Disease	68
	5.6.4 Exposure Control and Personal Protection.....	68
5.7	Rubber Fumes	68
	5.7.1 Visible Fumes	69
	5.7.1 Gases and Vapours	70
5.8	Solvents	70
	5.8.1 Benzene: C_6H_6	72
	5.8.2 Toluene: $C_6H_5 CH_3$	73
	5.8.3 Xylene: $C_6H_4(CH_3)_2$	73
	5.8.4 Methylene Chloride (Dichloromethane): CH_2Cl_2	74
	5.8.5 1,1,1-Trichloroethane (Methylchloroform).....	74
5.9	A Strategy for the Control of Dust and Fumes	75
	5.9.1 Assessing the Risks to Health from Dust and Fumes	75
	5.9.3 Occupational Exposure Limit Values Related To Working in the Rubber Industries.....	76
5.10	Selection of Control Methods	77
	5.10.1 Elimination and Substitution	77
	5.10.2 Containment	78
	5.10.3 Process Control	78

Update on Health and Safety in the Rubber Industries

5.10.4	Handling and Working Methods	78
5.10.5	Ventilation Control	78
5.10.6	Segregation.....	79
5.10.7	Housekeeping and Cleanliness.....	79
5.10.8	Respirators	79
5.11	Nitrosamines	79
5.12	1,3-Butadiene	81
5.12.1	Health Effects: Animal Studies	81
5.12.2	Health Effects: Human Studies	82
5.12.3	Industrial Exposure and Control	83
5.13	Work-Related Musculoskeletal Disorders	83
5.13.1	Prevention	84
6	General Recommendations.....	93
6.1	Personal Hygiene	93
6.2	Handling	93
6.3	General and Local Exhaust Ventilation.....	94
6.4	Skin Protection and Protective Clothing	95
6.5	Conclusion	96
