

C contents

1	Manufacturing and Polymerisation Chemistry	1
	1.1 Polyaryletherketone (PAEK) Nomenclature	1
	1.2 PAEK Producers: Past, Present and Future.....	2
	1.3 Manufacturing of PAEK	3
	1.3.1 Nucleophilic Processes.....	4
	1.3.2 Electrophilic Processes	12
2	Characterisation	17
	2.1 General Characterisation.....	17
	2.2 Quality Control Tests	17
	2.3 Crystallinity.....	18
	2.3.1 Crystalline Morphology	19
	2.3.2 Crystallisation Processes.....	21
	2.3.3 Measurement of Crystallinity	23
	2.3.4 Melting Processes	25
	2.4 Molecular Weight.....	26
	2.5 Chemical Structure	28
3	Properties and Processing of Unfilled Polyaryletherketones	33
	3.1 Introduction	33
	3.2 Properties	34
	3.2.1 Thermal Performance	34
	3.2.2 Mechanical Properties	36
	3.2.3 Chemical Resistance	38

Update on the Technology and Applications of Polyaryletherketones

3.2.4	Radiation Resistance	40
3.2.5	Fire, Smoke and Toxicity	41
3.2.6	Purity	43
3.2.7	Electrical Properties	43
3.3	Processing Techniques	44
3.3.1	Background	44
3.3.2	Drying	44
3.3.3	Processing Temperatures, Thermal Stability and Rework.....	44
3.3.4	Crystallisation and Annealing.....	45
3.3.5	Orientation.....	46
3.3.6	Surface Treatment and Joining Technologies	46
3.3.7	Laser Sintering.....	47
4	Product Forms.....	51
4.1	Standard Powders and Granules.....	51
4.2	Compounds.....	52
4.3	Composites.....	56
4.4	Films	59
4.5	Fibres	60
4.6	Fine Powders and Coatings	61
4.7	Stock Shapes.....	62
4.8	Foams.....	62
5	Competitive Materials	65
5.1	Introduction	65
5.2	Amorphous Sulfones and Thermoplastic Polyimides	67
5.3	Polyphenylene Sulfide	67
5.4	High-temperature Polyamides	68
5.5	Polyphenylenes	68
5.6	Thermotropic Liquid Crystalline Materials	70

5.7	Perfluoropolymers	71
5.8	Amide Imides	72
5.9	Non-melting Imides.....	72
5.10	Polybenzimidazole.....	73
6	Polyaryletherketone Blends.....	75
6.1	Introduction	75
6.2	Blends with Polyarylethersulfones	75
6.3	Blends with Thermoplastic Imides	77
6.3.1	Polyetherimide (PEI).....	77
6.3.2	Extrem.....	78
6.3.3	Polysiloxane /Polyimides	78
6.4	Blends with PPS.....	79
6.5	Blends with Polybenzimidazole (PBI).....	79
6.6	Blends with Fluoropolymers.....	80
6.7	Blends with Thermotropic Liquid Crystalline Polyesters (TLCP)	80
6.8	Blends with Polyphenylene	80
6.9	Blends with Other PAEK	81
7	Applications of Polyaryletherketones.....	85
7.1	Introduction	85
7.2	Industry Segmentation and Sales Volumes	85
7.3	Aerospace.....	88
7.4	Automotive and Transport	92
7.5	Oil and Gas	94
7.6	Electronic Devices	96
7.7	Semiconductors and Displays	101
7.8	Industrial.....	103
7.9	Food Processing.....	108
7.10	Consumer Applications	109

Update on the Technology and Applications of Polyaryletherketones

8	Medical Grades and their Applications.....	113
	8.1 Materials.....	113
	8.2 Applications.....	116
	8.2.1 Short-term Applications.....	116
	8.2.2 Permanent Implants.....	117
	Abbreviations.....	123
	Appendix.....	127
	Index.....	133
